Cleaning and disinfecting steps:

- 1) Identify the style which you want to clean or disinfect.
- 2) Consult either duvaltex.com or the style's card and refer to the Cleaning Code section of the style's specifications to see cleaning instructions.
- 3) Always test on a small non-apparent section to make sure the products used to clean or disinfect do not impair the color or texture of the surface.
- 4) Clean or disinfect by following the specific instructions.
- 5) Once you have cleaned or disinfected the textile, always wipe the surface with a damp cloth to make sure no cleaner or disinfectant residue is left behind.
